

Casement Window

The 5000 Series Casement Window will add a contemporary look to your home while allowing the maximum amount of daylight to enter. The clean lines and beveled exterior frame of this casement design will add a look of distinction to any residence. Fusion welded vinyl components, dual sash weather seals, and insulated glass units provide the maximum amount of protection from air and water infiltration. A crank handle allows the sash to open 90 degrees for cleaning glass surfaces from inside the home while providing easy and dependable operation.

5000 Series Casement Windows
